

There are four ways you can qualify to have your pledge increase matched (or doubled) through the Sustainability Fund.

- If you are pledging below the median, any increase to your pledge will be matched by the Sustainability Fund.
- If you are pledging above the median - AND - you increase your pledge by 20% or \$200, your increase will be matched by the Sustainability Fund.
- If you are pledging below the median - AND - you increase your pledge by 20% or \$200, your increase will be doubled by the Sustainability Fund.
- If you are a new member and / or have never made a pledge before, your pledge will be matched up to the ideal average (\$1600)

There are two conditions on this matching

1. That each pledge is made with the intent to maintain the pledge at that level for the next three years.
2. That each person who wishes to qualify for a match, needs to have paid their previous year's pledge.
